

What's new?

Introducing reason codes for stock adjustments

From this version, you will be able to select reason code that you have defined (find this in stock updates manual) in our Backoffice when adjusting stock.

In POS Backoffice you can find Stock module*.

For example, you can remove stock from product and select the reason why it's reduced.

WALLMOB

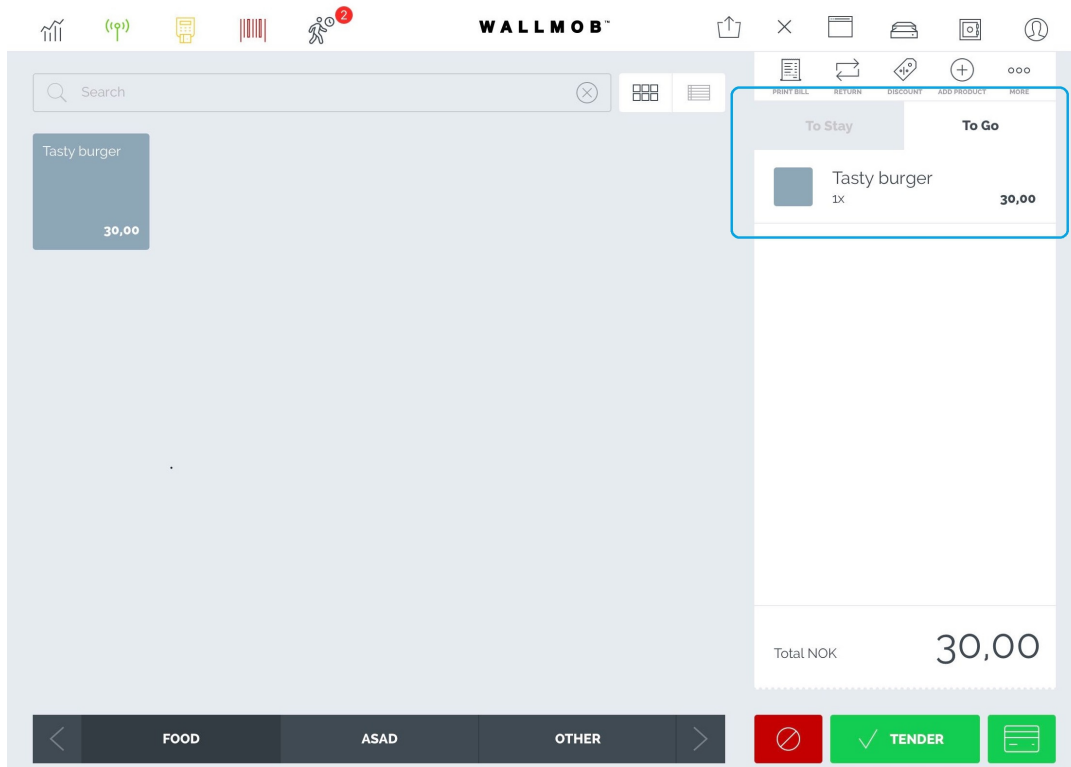

by

Eat in or eat out as default*

* Contact our support for enabling this feature.

Now there's a possibility to have "To go" price TAB as preselected when adding item to the bill. This feature is meant to assist you, if most of your clients buys products to go.

Nets and SumUP SDK updates

SumUP SDK has been updated to the latest version 3.4. This will enable using SumUP terminals on iOS 13.

Nets SDK has been updated to the latest version (1.2.11.0) as well.

Wallmob compatibility with iOS 13

The majority of iOS 13 related bugs has been fixed.
