

# Wallmob Backoffice Release Notes

---

**Version 2.20.3.0**

## Written by

Bjørn Willoch Bjanger, Product owner

## Contents in release

### **2.20.3.0**

These are the major changes in the backoffice version 2.20.3.0

We have implemented an accounting integration that allows you to define accounts and VAT codes for all your tenders and revenues per VAT type, and setup delivery of a file in the popular GBAT10 format that is accepted by Mamut, Visma Business, PowerOffice Go, Tripletex, 24 Seven Office. The file is delivered to an SFTP server, from where import to the accounting system can be set up. The integration will run every night with aggregated numbers. If anything fails, you can set up an email address that will be notified about errors.

We have now implemented a layout template editor that lets you define product button templates for how you want to display sales buttons for products. This functionality replaces the functionality previously held in Bounty web site.

For some users of Wallmob, the number of registered devices (the use of an iPad for a register) can grow very large. Previously, all devices were downloaded to the iPad during initial loading of a shop. This could be as many as 25 000, as an example from one masteruser. Now, only one device entity is downloaded, thereby improving the loading time significantly.

Several control flags and attributes for POS behaviour were added in this release.

Several bugs and improvements have been addressed.

## API changes

Boolean attribute "is\_shared\_bill" added to order entity.

Boolean attribute "did\_print\_copy" added to order entity.

## Issues list

The following issues are included in this backend release:

 Should not be possible to delete the user while user is logged into it	2.20.3.0 BO	 SMB-2083		5
 Move POS Layout templates builder from Bounty to WBO	2.20.3.0 BO	 SMB-2046		7
 Configurations set for the role are not working as user	2.20.3.0 BO	 SMB-2071		2
 Settings page for accounting integration	2.20.3.0 BO	 SMB-2020		3
 Password changing forms in Account page should be disabled when logged in as user	2.20.3.0 BO	 SMB-2072		2
 Export of accounting data in GBAT file	2.20.3.0 BO	 SMB-2000		9
 Product with variants duplicates as eligible item for campaigns	2.20.3.0 BO	 SMB-1890		4
 Parameter to set a value for timer to log out user after inactivity	2.20.3.0 BO	 SMB-2058		1
 Allow shipping information inside order entity	2.20.3.0 BO	 SMB-2108		1
 Rename kdsShowOnlyPreparedItemsInDelivery	2.20.3.0 BO	 SMB-2124		-
 Fix Order update adding shipping_information	2.20.3.0 BO	 SMB-2136		1

 Add is_shared_bill as attribute on order	2.20.3.0 BO	 SMB-2158		1
 Move libraries to NPM	2.20.3.0 BO	 SMB-2140		1
 Make login functionality testable and write tests for it	2.20.3.0 BO	 SMB-2141		2
 Add flag to campaign benefit products for "Select most expensive"	2.20.3.0 BO	 SMB-2112		2
 Enable multiple customer groups on customer	2.20.3.0 BO	 SMB-2090		5
 Prevent OrderLineItems removal from Order on update	2.20.3.0 BO	 SMB-2134		3
 Only return devices for current shop in changes endpoint	2.20.3.0 BO	 SMB-2135		1
 Add parameter to control if preorders should have start and finish steps	2.20.3.0 BO	 SMB-2143		1
 Enable Dintero payments	2.20.3.0 BO	 SMB-2156		2
 Replace hardcoded old address with translation	2.20.3.0 BO	 SMB-2178		1
 Error when generating stockLocationReport CSV report	2.20.3.0 BO	 SMB-2167		-
 Add order attribute "did_print_copy" to whitelist	2.20.3.0 BO	 SMB-2234		-
 product_variants array is empty for promotion_campaigns in changes	2.20.3.0 BO	 SMB-2245		-
 Saf-t report sending is failing	2.20.3.0 BO	 SMB-2249		-
