

# Wallmob country coverage and compliance

*Last updated 2020-05-07*

The purpose of this document is to describe where Wallmob is compliant with various legislation. It also states what to consider and check when installing or using wallmob in various countries.

As wallmob is an open platform available on the web it can be accessed from any country in the world. However the wallmob POS is available through Apple App Store only in countries where it is available or compliant for at least one type of business. In some countries legislation is dependent on the type of business, so please check this document for compliance.

More information on various legislation can be obtained from Extenda Retail Country Handbooks where available and upon request.

## Supported countries

### Denmark

- No fiscal legislation or special rules.
- VAT rates are set up and adjusted annually if changed.
